

Curriculum Vitae

Filip C. de Melo was born in the summer of 1986 in Fritsla, Sweden. His childhood was very coloured by arts in different shapes, such as painting, theatre and music. He begun playing the guitar in early age, and tried out many other instruments until he discovered composition.

The music of Filip has tried many paths, and has many left to take. What he find interesting in music is to find connections between the visual arts and the sounding art. To combine colour and lines, or movement, out of a painting or a photography and make it to a piece of music.

An other typical thing is the usage of text which is often being used in more or less all of his compositions in any way.
